TESTIMONIAL

To whom it may concern,

S & J Electrical trading as Laser Electrical Mt. Gambier were engaged by Nicholson Construction as the Electrical sub-contractor on the Coleraine District Health Redevelopment Project in September, 2011.

The overall construction value of the Coleraine Hospital project was in excess of \$ 18 million with the electrical component valued at approximately \$ 2 million. The project was to be constructed over a period of 28 months and due for completion December, 2013.

The project consisted of the construction of four new buildings and the full refurbishment of an existing nursing home.

The new build included an Emergency Department, X-ray, Administration, Acute Care, residential Bed Based Services, a Support Services Building including a full Commercial Kitchen and a Primary Care Facility. The refurbishment of the existing 23 bed nursing home included the integration with the new facility as well substantial extension to include new Physiotherapy, Day Activities and Laundry Facilities.

Laser Electrical were responsible for all the co-ordination and installation of the new Supply Authority Mains Kiosk, underground power supply to all buildings, switchboards, Nurse Call, Fire Detection, Lighting Control, Security and two back-up generators.

I highly commend Laser Electrical for their co-ordination and installation of Electrical Services for this project. Their on-site supervision and attendance was excellent for the duration of the project and the quality of their work was second to none. It was evident from the installation, from rough-in to fit off, that Simon and his Staff take great pride in their work. This was particularly evident when we reached the end of the project as the commissioning was completed without any major non-compliance and the electrical manuals supplied and signed off by the Services Consultant without comment.

I would also commend Laser Electrical on their administration, especially in procurement and accounting. At no stage during the project did Laser Electrical fail to complete their part of the works on or ahead of schedule. The project overall, attracted in excess of \$ 2 million worth of variation works of which a large proportion related to electrical items. The response from Bonnie for variation quotations was fantastic. Great job!

With the assistance from Simon and his team, the project finished 4 months ahead of program. It was a pleasure to work with this contractor on a major project.

I can highly recommend Laser Electrical Mt. Gambier as an Electrical Contractor for future projects.
